

What We Do

Think of us this way – we provide enterprise-class backup, DR and archiving in one solution priced for every business.

How We're Different

What makes us different is we scale without additional hardware, are push button easy and are military-grade secure.

Smart, unlimited cloud capacity

Based on rules you set, keep critical data on site and push less important data to the cloud automatically. Intelligently spillover data to the cloud with no storage limits.

- **Infinite cloud scaling**
- **Intelligently target storage** – You choose the storage target for your data

Recover in the cloud in minutes

Instead hours or days to recover critical applications now with a push of a button you can be up and running in less than 15 minutes.

- **Push-button easy**
- **Fast recovery**

Military-grade security

Others either don't protect or only quote bit encryption numbers, we protect all your data with military-grade security. Remotely find mobile devices, take control, and wipe confidential data.

- **Private key encryption** – Only you access your data
- **Double blind encryption** – Protect against vendor or hacker accessing your data
- **Control & wipe data on mobile devices**

DR + backup + archive

Avoid the cost and complexity of three separate solutions, you only need one to protect your data in the cloud.

- **DR** – for immediate failover and fast recovery
- **Backup** – files, folders, servers and endpoints
- **Archive** – in the cloud, on premises or both

Protects everything

We have all your servers & devices covered:

- **Full backup for laptop, desktops and mobile devices** – this critical data must be protected too
- **Native backup of all server types** – applications, file, mail, web servers, etc.
- **Backup and DR of virtual and physical servers** – Native, agent-less VMware and Hyper-V (July 2015)
- **100+ OSs supported** - The big ones and the little ones – Microsoft, Apple, Linux, UNIX and others

Works in any cloud

Freedom of cloud choice – no vendor lock in.

- **Our Cloud** – twelve worldwide data centers
- **Your Cloud** – deployment in your private data center
- **Public Cloud** – Azure, Amazon

Breakthrough value

One solution with all the enterprise-class functionality and features included but priced for every business.

- **Win more bids**
- **Be a hero to your clients**
- **Make more margin**

Everything included

We have all the functionality you need in one easy to install and use solution.

WAN Acceleration

Move data to and from the cloud fast

Deduplication

Not only inline dedup but global dedup for the fullest data reduction possible

Cloud Gateway

Intelligently spill data over to the cloud
